Seinäjoki, Finland 28.12.2021

**Eevia Health Plc receives 3,4 MSEK/0,34 MEUR sales order for bilberry extract**

Eevia Health Plc, ("Eevia" or "The Company"), has received a large sales order from its Australian distributor Ingredients Plus. Ingredients Plus serves leading nutraceutical brands in Oceania and Asia with high quality ingredients. The end customer is a major natural health company based out of Sydney, Australia selling its products across Asia and Oceania.

The sales value of this order is c.335,000 EUR and the product is Feno-Myrtillus 25 bilberry extract. The order is expected to create repeat sales of this product going forward.

"I am very pleased to see how our berry extracts are included in more and more nutraceutical products. It is great to see that our strategy of providing high quality, 100 % organic ingredients from the arctic region is paying off. I look forward to more business from the Australian market and I am happy about the great cooperation with our distributor Ingredients Plus." Stein Ulve, CEO

The **Feno-Myrtillus®** product range is extracted from arctic bilberries. The powder is deep blue, almost black due to the high concentration of the anthocyanins. These are likely to be the key bioactive compound responsible for several health benefits of bilberry extracts, as well as its high antioxidant potency.

## INFORMATION ABOUT EEVIA HEALTH PLC

Eevia Health Plc, founded in March 2017, addresses significant health problems with bioactive compounds extracted from plant materials. The materials are primarily wild-harvested from the pristine Finnish and Swedish forests near or above the Arctic Circle. The extracts are sold B2B as ingredients to dietary supplements and food brands globally. These global brands utilize the ingredients in their consumer product formulas.

Eevia Health is a manufacturer of 100% organically certified plant extracts. Although a significant product; Elderberry extract, is made from cultivated berries, most of Eevia's other raw materials, such as bilberry, lingonberry, chaga-mushroom, and pine bark, are wild-harvested in a sustainable fashion.

Eevia Health operates a modern green-chemistry production facility in Finland. The factory operates near the raw material harvest areas. A uniquely short value chain enables an environmentally friendly carbon footprint, competitive pricing, and extreme transparency. Eevia listed its shares at Spotlight Stock Market in Sweden in June 2021, with the short name [EEVIA](#).
